ANESTHESIA/SURGERY CONSENT FORM

Owner's Name: _____ Patient's Name: _____

- 1) I hereby authorize Dr. _____ and whomever she may designate as her associates to perform the following procedure(s) or operations: _____.
- 2) It has been explained to me that conditions may arise during this procedure whereby a different procedure or an additional procedure may need to be performed and I authorize my veterinarian to do what is needed and necessary to provide the proper care of my pet.
- 3) I have been advised as to the nature of the procedure and the risks involved. I understand that complications including, but not limited to, anesthesia risks, infection, swelling, bleeding, cardiac arrest, and death could result. I acknowledge that no guarantee has been made as to result or cure.

Our greatest concern is the well being of your pet. Before putting your pet under anesthesia we will perform a physical examination and blood testing. Such tests are especially important before anesthesia.

Microchip Identification System: A microchip implanted just under your pets skin near the shoulders, contains a permanent identification number. After a veterinary staff member or shelter scans your animal, they can call the 800 number, available 24 hours a day, 7 days a week. The recovery service will provide important identification information about your animal.

\$ _____
 YES, I want my pet to have a microchip implanted. I am aware there is an additional enrollment fee.
 NO, I decline.

Additional Information

Does your pet have a history of seizures? Yes No
Has your pet been fasted from food for at least a 12-hour period? Yes No
Does your pet have any allergies to any medications? Yes No

Any other concerns before surgery? _____

Owner's Signature: _____ Date: _____

Phone # where we can reach you today** : _____

** It is imperative that we have a phone number to reach you at throughout the day. We will be unable to perform essential tooth extractions if we cannot reach you by phone. Extraction surgery will then have to be rescheduled.

** Undiagnosed cardiac (heart) conditions increase the risk of anesthesia. Complications may occur, including death.

** Brachycephalic breeds of dogs have a higher risk of anesthetic and breathing complications.
